### Profile

---

- I'm a driven and curious second-year B.Tech  student with a strong foundation in programming and a growing passion for building impactful, real-world tech solutions. As a full-stack developer proficient in the **MERN stack (MongoDB, Express.js, React, Node.js)**, I bring hands-on experience in crafting dynamic websites and responsive web applications.
- Fluent in **C++, JavaScript, HTML, CSS**, and **Tailwind CSS**, I enjoy turning complex problems into elegant, user-focused solutions. I'm also skilled in using **GitHub** for version control and collaboration. Whether it's designing clean front-end interfaces or building robust back-end systems, I approach every project with creativity, a problem-solving mindset, and a commitment to continuous learning.
- Known for being resourceful, analytical, and always up for a challenge, I'm constantly pushing myself to learn more, build better, and create technology that makes a difference.

## Skills

---

C++

Html

CSS

TailwindCSS

JavaScript

Node.js

Express.js

MongoDB

Github

Teamwork and collaboration

Friendly, positive attitude

Flexible and adaptable

Communication

Fast Learner

---

## Projects

---

### **Personal Portfolio Website (Full-Stack)**

*Currently developing a full-stack personal portfolio website to showcase my skills, projects, and achievements. Built with the MERN stack (MongoDB, Express.js, React, Node.js), the site features a sleek, responsive design, dynamic project loading, contact form with backend email integration, and a dashboard for content management. It reflects both my technical expertise and my design sensibility.*

### **Food Tech Web App – In Progress**

*Designing and developing a full-fledged food tech web application focused on enhancing user experiences around cooking, recipe sharing, and community interaction. The app includes features like personalized recipe recommendations, user profiles, community chat, and integration with third-party services for ingredient delivery. It's a passion project that allows me to combine tech and creativity to solve real-life problems.*
